About Me

I am a software developer passionate about building solutions for everyday problems. Currently, I primarily work with high-level languages and frameworks, but I have interest in learning both modern and legacy technologies. In the future, I would like to contribute to or build low-level software and core tools that empower other developers to create their own solutions.

Education

ALX Software Engineering Program Certificate of Software Engineering	Feb 2023 – Oct 2024
ESGAE Bachelor of Software Engineering	Oct 2023 – Jul 2024
